## MAIN LEVEL

The façade is clad in integral color stucco that perfectly reflects the Marina light – a gorgeous grey with slight hints of blue-green as the day evolves. Black wood trim, natural wood horizontal garden fencing and beautiful landscaping come together to welcome you home.

The floor plan truly delivers with entertaining and indoor-outdoor living the focus. The heart of the open plan main level is the large gas kitchen with top of the line appliances including two dishwashers, wall of pantry storage, Calacatta marble counters and warm wood cabinetry with custom hood. The kitchen extends into family and breakfast areas and a covered terrace for gas grilling. Next, discover the dining room, living room with horizontal gas fireplace and windows onto Rico Way, and a truly spectacular central wine room with glass wall for display. Powder room and walk-in closet complete this level. The plan is simply brilliant. Everything is in its perfect place.

## UPPER LEVEL

The upper level features a serene spacious master suite retreat with two-sided fireplace, flat screen TV in the Calacatta marble master bath, large dressing room and south-facing terrace. Two additional bedrooms that open to the north terrace, laundry and hall bath complete this level. An exceptional design feature of the home is the large skylight that bathes the sleek staircase connecting the levels in natural light.

# GROUND LEVEL

The ground level's foyer is simplicity itself and leads to the fourth bedroom, a suite with exterior access and full bath. At the southern end of this level is the spacious and fun media room with wall of doors open to the south patio and lawn with raised garden. The turf lawn can double as an ideal putting green and includes a firepit with wood cover that serves as an outdoor table surrounded by built-in wood benches. The garden extends around the eastern side of the property, providing beauty from every window. Another laundry area plus two-car garage with dual storage rooms, mechanical room and electric car chargers complete the lower level. A third car can be parked in the driveway leading to the garage.

State of the art infrastructure is managed by a Control 4 system. Features include radiant in-floor heat, Ethernet + telecom, sound system, security/fire alarm system with cameras + intercom. In addition, there is landscape irrigation for the garden and terraces, and electric car chargers in the garage (one for Tesla, one universal).
